SYRAH | HARVEST 2017

Varietal wine made with grapes of the Syrah variety, carefully selected from our estates.

VINEYARD LOCATION

- Maipú district (Mendoza Rivers High Valley), province of Mendoza.

CLIMATE | This privileged area has a particular micro-weather characterized by dry summers, warm and sunny days and cold nights. Grape development is favored by the thermal range, making them reach high concentration of aromas and excellent health.

SOIL | Alluvial, silty-loam, shallow.

TRELLIS SYSTEM | Traditionally high espalier-trained vineyards. High cultivation density; low yield vines that, associated with the varietal purity, allow high quality grapes.

HARVEST | By hand, selecting the best clusters so as to have the best grapes for the winemaking. The harvesting moment depends on the grape ripening, a process that's followed carefully to reach an optimum point with the highest aroma expression.

WINEMAKING | A moderate maceration classic method is made in stainless-steel tanks with strict temperature control, not higher than 25 degrees Celsius. Once the fermentation is completed, the wine is racked, clarified, filtered and stabilized by cold temperatures.

AGING | This wine is aged in large French-oak casks of 5,000-20,000 liters where a development process occurs throughout the years achieving an interesting complexity of flavor and aroma.

TASTING | Intense red wine with violet tones in the periphery. Voluptuous in the mouth and with a long finish. According to the preference of the consumer, the aging of this wine in its bottle can be prolonged for a period of 5 years or more. Due to its characteristics it is an ideal wine to accompany red meats, pastas and spicy foods. It is advisable to consume at a temperature of 18 to 20 degrees Celsius. To guarantee its properties, the bottle has to be stored in horizontal position, keeping the wine in contact with the cork, away from light and heat.

PRESENTATION

- 750 milliliters and 1.5, 3 and 6 liters bottles.

- Cases: 6 x 750 milliliters bottles.

- Special harvests in different capacities (750 milliliters, 1.5, 3, 5 and 6 liters bottles) depending on the year.

ANALYTICAL DATA

Alcohol	12.4%
Sugar	1.9 g/l.
Volatile acidity	0.4 g/l. in acetic acid
Total acidity	4.7 g/l. in tartaric acid
Total SO ₂	89 mg/l.
pH	3.4
